Object: : adjust of new bumper

- **Adjust the Clearance of Front Bumper**

The above two pictures show the different clearance between radiator and front bumper.

The Left picture, clearance is smaller and can be adjusted by following process. Due to the front bumper doesn't install on bike when we delivery to you. Therefore, once you find the clearance is too small when you install it on, please kindly follow the suggestion and adjust.

Step1, Take off bolt of radiator

Step 2, Take off spacer of radiator
